I originally played this on the Sega Saturn when it first came out. I remember how hilarious some of the dialogue and death scenes were. I didn't even know they made a second one until I found it on Steam. Also favorite death is between PissingOff the guy in the plane Hangar and blowing your foot off while powering up Charlie.. This game is single-handedly responsible for my need to forever invert y axis in every game. Even after almost 15 years, I still have muscle memory for the Charlie level... and have just discovered that you can press enter if you miss one of the nanites... hundreds of hours of attempts as a kid without this knoweldge, but damnit, beating that level straight was an incredibly thrilling moment and the beginning of my love for gaming. Great atmosphere, wonderful sound design; this was a revolutionary game in 1994, and it's a welcome trip down memory lane. My sincere thanks to the developers for releasing this gem on Steam for everyone to enjoy once again.

5V5. Toggle F to reverse mouse vertical aim.. A masterpiece, but second part is still better: they got rid of different scanners(biomass scanner is not used even once in part 1, infrared is used one time), they converted western-style guard shootings into another railshooting sequences, and second one is longer, has more railshooting parts and i think has better graphics. Well, and more character interaction.

Still first one has pretty cool plot.

Please bring Cyberia 2 to Steam for insta-purchase.. Some may call this junk, me, I call it classic!
