Lazaretto gets a big thumbs up! Check out my video for more info: <https://youtu.be/NSDzw8lh5TE>. Amazing for what it is but I think it's not being updated anymore.. In short, Gyromancer isn't rewarding at all. Everything outside of the gameplay is generic as hell.

It started out very fun, a mashup of a bejeweled and a very simple rpg, but not too far into the game it introduces a mechanic that ends up being so punishing that it sucked out all the fun.

The puzzles themselves are battles where you choose a monster with elemental affinities and rotate the pieces (in only one direction, mind you) to create matches to build up to attacks on your enemy, the direction lock is already pretty punishing but the game was fun enough at that point. After a few chapters, it introduces a penalty for "idle moves" when you dont create matches that **DRASTICALLY** favors the enemy as punishment.

I tried to power through it, but despite my best efforts it just wasn't fun anymore.. I thought the memes were pretty cheeky, it was a decent little animation and it's free so give it a go.

I give it 6 Toupees out of 8, GG developer :^). **WHAT IS THIS???**. Grabbed a couple copies of this and tried playing with a friend, but in the end neither of us really enjoyed it.. A fun game, indeed.

But can be frustrating at times. Since the money, upgrades and trace follow to the next level. So if you screw up in the early level you might have to pay for it later.. This is a fun shooter just for fun. You have all weapons already and can switch between them. There are 3 maps and you can have a total of 12 players (bots) (I played offline cuz I wanted to get achievements, plus no one plays online in this game). I liked it it was fun the ai is derpy and bodies go flying and random stuff happens. Sure the graphics are bad but I dont care the gameplay I really enjoy. Overall a cool little shooter to play in your spare time

infinite loading for champion, not even able to play.
can't connect with coop, not even able to play.
random crash even in the menu, not even able to play.
wait for the patch, guess how long will I wait?

never pre order any game from this company and wait for the discount. It's a really short game you can clear in an afternoon but it's enjoyable if you like games where a cute kid gets crushed, amputated, skewered, eaten by a giant spider, or splattered by a grandfather clock that doesn't like being touched. Though you will die constantly it's not that difficult and even if you skip a savepoint or two you can get back to where you were in a heartbeat.. So far so good. That graphics and sound, the atmosphere, and especially the camera angles are highly reminiscent of classic Resident Evil and Silent Hill games. The only downside to the 1st part in my opinion is the final battle (if you can call it that) with the shark, but otherwise this is a good start and I can't wait to see what the rest has in store. If you're hesitant to get this, just keep in mind it's only \$5 and should keep you busy for around 2-3 hrs.. The game doesn't even start. Piece of crap.

EDIT: Okay, thanks to the developers the game now runs... was not worth the wait.. From the few rounds I've been able to play so far due to the low player count, I have really enjoyed this game. The pace of each round is great, graphics have a nice feel to them, love the lighting, love the gameplay. It's a little rough around the edges but that is expected, especially in early access. Overall I do think the game has a lot of potential and I hope it brings more players with such a low price point.. One of the best VR games I've played so far. Feels like an actual complete game. The locomotion and movement is just awesome. The ability to be first person on the ground, yet high up in the sky looking down is just a really really cool feeling. I've played sitting in a chair for hours it seems. The immersion is just amazing. Yes it's "expensive" for a VR game, but it's an actual game, and not just a demo. One of my favorites at this point. I realize I sound like a spambot, but I'm not. The game is relatively simple (so far at least) since you only have a few spots to actually place towers; unlike Defense Grid or other TDG where you can make your own maze and direct things. But maybe later levels will allow for that, not sure.

Anyway I've wanted to refund quite a few of my VR purchases as I completed them in 10 minutes. This one I'm still playing and enjoying greatly.
