Too much pixel hunting, confusing and arbitrary puzzles, and a wholly unnecessary 'insane asylum' interlude in the middle of the chapter. I won't be buying the full game.. What an awesome, intuitive, cute, and most importantly, addictive little game! It's very difficult to put this one down, no matter how much your pride tells you to walk away. It is stark, industrial and visually distinct in such a way that you can easily enter a zen-like focus in what would otherwise be a confusing mess. This is something I'll absolutely come back to time and again.. I find these raving positive reviews about this game highly suspicious.

This game is very small on content, feels like a simple flash game.

And it still looks more like an early beta game, even though it is advertised as a finished product.

Beware.. I've played this game before and it is one of the BEST Nancy Drew games. However, it will no longer load/run on Steam, which is super disappointing :(If you can find it somewhere else, play it! It's awesome, it just doesn't work here for some reason..... The game doesn't look nearly as good as it does in the trailer or the screenshots. It has more content than most VR games, but it's definitely not worth 40 bucks. The exploration and wave shooter levels are very limited and outside of that is almost nothing to do. I tried multiplayer, but it's not even possible to find other people playing. There aren't even any human NPC's (such as visitors) in the game even though they are shown in the trailer.

Issued a refund.

Unfortunately this is my first "not recommended" review. This "game" is awesome, very well polished and fun. However, it is a single mission and in my 17 minutes of play I managed to complete 3 separate playthroughs. This is more of a tech demo than a stand alone game. In under 20 minutes I've done it all, simply not enough content to warrant the price tag (\$1 a minute in my case). I have refunded for now but once this title has more content it will certainly warrant a purchase.. The worst game ever played. The camera is so dumb, this game is just Car mechanic 2014 with trucks. Don't waste your money.. WTF my pc can run Gta V, Apex Legends, PUBG and Crew 3 smoothly and can't run this piece of♥♥♥♥♥♥♥♥♥♥ while i was playing this game my pc was burning no ♥♥♥♥♥♥♥♥♥♥ing joke if you have a bad computer never buy it if your computer is at normal specs buy it it might lag but worth it i only could finish the first chapter but you can tell that this is a good game the music is so good like jazzy music while you are slaughtering people just amazing. This game although buggy and very laggy is still very fun. This is one of those choose how you play type games where you can be a law abiding citizen or kill everyone. But this one I feel actually expands upon that idea where it actually pays to be a citizen. There are missions, scenes, (like aliens crashing but dont take the gun) guns cars, wanted level etc. Like I said the game is in very early development and is still buggy but I feel with a little extra work and some settings. This game can thrive just fix the missions a little bit like if i do something for the mayor i should have right to not be arrested but vice versa if someone stole a kids treehouse and I have to kill someone. (Not joking). I really enjoyed this game, even with the season pass, I wish it went for longer. The world is beautiful and I like how it had side quests. I got a bit frustrated at the card system as no matter what you equip, the abilities you use would ultimately be random.. A very nice reincarnation of Super Hexagon.

If you liked SH, then Get it, get it now!. Got it on sale for 0,39€. Atmosphere is nice, but doors were hard to open. Lol'ed at a jump scare, just to be scared by the next one xD Puzzle was solvable, but not too easy. remotley fun, not very though, you start of with a medium amount of resources and theres not really any good way to get more at all. Oh and there's no save feature. Refunded.
